

Using The Canola Meal Update in NDS

Add The New Feedbank

- Download the Feedbank file
- Use the import export tool to import the file
- Click on feed analysis and import the file
- Open the feed file

Import the File and View

The screenshot displays the NDS Professional software interface. At the top, the title bar reads "Nutritional Dynamic System - NDS Professional". Below it, the "NDS PROFESSIONAL" logo is visible on the left. The main menu bar includes "Startup", "Costs", "Utility", "Import/Export", "Recent items", and "Recent Farms". The "Import/Export" menu is open, showing options like "Import", "Feeds analysis", "Feeds costs", "Recipes", "Composites", "Farms", and "Settings". A yellow callout box with a red arrow points to the "Import" option, with the text "← 1 Import file".

Below the menu bar, there are several panels. The "Import/Export" panel is active, showing "Import feature" with a yellow callout box pointing to a folder icon and the text "← 1 Import file". Below this, the "Export" section is visible, with options for "Import/Export", "Excel Export", and "Synchronize nutrients".

On the right side, the "RU.M.&N. NUTRITIONAL DYNAMIC SYSTEMS" logo is present. Below it, a dropdown menu shows "Cattle". The "Single Farm" and "Feeding Center" tabs are active. The "Feeds" section is highlighted, with a yellow callout box pointing to it and the text "← 2 Feeds". Other sections like "Nutrition" and "Management" are also visible.

Verify that Kd Pro= Kd CHO 3 is NOT checked, and KD Pro B2= 2.00

Nutritional Dynamic System - NDS Professional

NDS PROFESSIONAL Ver. 3.9.5.05
